## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/15/2008 has been entered.

### ***Allowable Subject Matter***

Claims 1, 5-8, 11, 15, 18, 22, 24, 27, 30-38, 40, 43, 44, 46 and 68 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1, 15, 18, 24, 27, 30-38 and 68, the prior art of record does not teach nor suggest, in the claimed combination, a micro-relay with a first substrate having stationary contacts and a stationary electrode; a second substrate, having a stationary contact, arranged so as to face the first substrate; and a frame sandwiched between the first and second substrates to realize a hermetical sealed structure, a movable portion with multiple movable contacts parallel relative to the first and second substrates and attached to the frame via springs wherein the multiple movable contacts are located between the stationary contacts without making contact with any of the stationary contacts of the first and second substrates when a voltage is not applied between the movable electrode and the stationary electrode, and when the multiple movable

contacts are released from a connecting state in which the movable contacts make a connection with the stationary contacts of the first substrates, the movable contacts are disconnected therefrom and make a connection with the stationary contact of the second substrate that is at a ground potential.

Claim 43, the prior art of record does not teach nor suggest, in the claimed combination, a micro-relay further comprising a base substrate that supports the first substrate, members that connect the movable electrode and the stationary electrode to pads formed on the base substrate, and resin that covers the first and second substrates and the movable plate.

Claim 44, the prior art of record does not teach nor suggest, in the claimed combination, a micro-relay comprising: a first substrate having stationary contacts and a stationary electrode; a second substrate arranged so as to face the first substrate; and a movable plate arranged between the first and second substrates, the movable plate having a frame and a movable portion, the frame being sandwiched between the first and second substrates to realize a hermetical sealed structure, the movable portion having a movable electrode facing the stationary electrode, and a movable contact facing the stationary contacts, the movable portion moving between the first and second substrates due to electrostatic attraction that develops between the movable electrode and the stationary electrode, wherein the frame has a protrusion and the movable portion has a counterpart recess.

Claim 46, the prior art of record does not teach nor suggest, in the claimed combination, a micro-relay comprising: a first substrate having stationary contacts and a

stationary electrode; a second substrate arranged so as to face the first substrate; and a movable plate arranged between the first and second substrates, the movable plate having a frame and a movable portion, the frame being sandwiched between the first and second substrates to realize a hermetical sealed structure, the movable portion having a movable electrode facing the stationary electrode, and a movable contact facing the stationary contacts, the movable portion moving between the first and second substrates due to electrostatic attraction that develops between the movable electrode and the stationary electrode, wherein the movable portion and the frame have an identical thickness.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Iwata et al. [US 6,828,888] discloses multiple features of the claimed invention but does not constitute prior art due to its filing date.
- Miller et al. [US 5,372,515] discloses a mechanical ESD protector.
